Get clever about Climate – Free Online Course on Climate Change

The Managing director of the DKK, Marie-Luise Beck and the Head of Education, Bettina Münch-Epple, WWF Germany shows, how this MOOC can serve as education for sustainable development.

Two speakers of the MOOC, Mojib Latif and Christiane Textor, report their experiences and former Minister from Peru, Manuel Pulgar-Vidal, now with WWF, reflects the value of digital learning in emerging countries.

Science for everyone: #ClimateCourse

Climate change is one of the major challenges for the international community. However, there is no intuitive approach to the problem. Rather, it can only be grasped through scientific knowledge. This is why our Climate Course explains the scientific basis of climate change, the impacts on nature and society, and identifies potential solutions – so that fact-based knowledge is available for everyone and can guide the transformation process towards a sustainable future.

Speakers & Panelists

Dr Christiane Textor, Head of the German IPCC Coordination Office

Manuel Pulgar-Vidal, Head of WWF's Global Climate and Energy Practice, WWF

Prof. Dr Mojib Latif, Chairperson DKK
